

Fleet Charging Solutions

For Government, Utility and Private
Fleets of Electric Vehicles

ChargePoint, the world's largest and most open EV charging network, simplifies EV charging for your fleet. We make it easy and hassle-free to deploy EV charging, operate your fleet and save money.

Simplify Your Operations with Smart, Networked Charging Stations

Our smart, networked charging stations are designed to make your operations easy to manage. You can get real-time charging station information and generate detailed reports on energy use, greenhouse gas emissions avoided, fuel savings and more, all from a single dashboard. We also continuously deliver automatic, over-the-air software updates, so you never have to wait for the latest features and improvements.

Maximize Cost Savings with Energy Management

Our advanced energy management tools can lower your total cost of ownership. With smart, networked charging stations, you can reduce installation costs and remotely shift charging to times when electricity rates are the cheapest.

Keep Your Operations Running Smoothly with ChargePoint's World-Class Support and Services

Fleet vehicle availability is critical to your business, which is why we offer comprehensive support for you, your drivers and your charging stations. Our world-class support team is standing by to help your drivers and station managers. We also have your stations covered with ChargePoint Assure, our industry-leading parts and on-site labor maintenance program.

Fueling Solutions for Every Charging Application

Wherever your fleet vehicles need to charge, ChargePoint can tailor a fleet solution to meet your fueling needs.

Depot Charging

ChargePoint CPF25 stations are designed specifically for dedicated depot applications. The CPF25 is a Level 2 charging station available in wall and pedestal mount options. We also offer DC fast stations for businesses that require quick vehicle turn-around, such as taxi and delivery services.

Benefits

- + Know which vehicles are charged and ready for service through real-time updates
- + Ensure that only fleet vehicles can use your depot charging stations through Access Control
- + Panel sharing reduces installation and energy costs
- + Lower energy costs through Scheduled Charging
- + Avoid trip hazards and keep your operations safe with our cable management option
- + The first ENERGY STAR® certified EV charger: CPF25 uses 40% less energy than a standard EV charger when in standby mode

 ✓ Mixed Use

CPE200 50kW DC Fast Station
 ✓ Depot
 ✓ Mixed Use

CT4000 Level 2 Station
 ✓ Mixed Use

ChargePoint Home Level 2 Station
 ✓ Single-Family Home

Mixed Use Charging

ChargePoint CT4000 stations are designed for mixed use applications, where employees or the public can charge their personal vehicles on the same stations used by fleet vehicles. Mixed use charging makes it easy to share infrastructure costs across multiple charging applications.

Benefits

- + Get all the benefits of our depot solution, including energy management, advanced analytics and cable management
- + Allow personal vehicles to charge during weekdays and reserve stations for fleet use on nights and weekends through Time of Use Access Control
- + Manage station usage by allowing employees to get in line and be notified when it's their turn to charge with Waitlist
- + Set different prices for fleet vehicles, employee personal vehicles and the public, while ChargePoint handles all collections and funds transfers for you with Flex Billing

Home Charging

ChargePoint offers home charging stations for drivers who take their fleet vehicles home at the end of the day. Whether they charge in a single-family home or in a multi-family apartment or condo, energy costs can be billed to the fleet.

Benefits

- + Reimburse drivers for home energy costs and generate detailed reports
- + Lower energy costs by shifting charging to times when electricity rates are lowest
- + Manage and view usage reports for all charging sessions—home, depot and mixed use—from a single dashboard

On Route Charging

Whether you choose to deploy depot or mixed use charging stations, your fleet vehicles may need to charge on route. The ChargePoint Fleet Card gives you a convenient way to pay for charging at public ChargePoint stations.

Benefits

- + Account for all charging purchases made by your fleet vehicles and generate detailed reports
- + Negotiate deals with other station owners for discounted charging or exclusive access for your fleet vehicles

Charge Your EV Fleet Everywhere

Scenario	Overview	Level 2 Stations and Cloud Plans	DC Fast Stations and Cloud Plans	ChargePoint Fleet Card
Depot	Dedicated fleet vehicle charging	CPF25 and Cloud Plan	+ CPE100 and Cloud Plan + CPE200 and Cloud Plan	On Route Charging: + Charge at public ChargePoint stations that require payment + Negotiate discounted rates + Integration with your fuel card provider
Mixed Use	Fleet, employees and/or the public share charging stations	CT4000 and Cloud Plan		
Home	Employees charge fleet vehicles at home	+ ChargePoint Home for Single-Family Homes + CPF25 and the Multi-Family Home Service	N/A	

Why ChargePoint for Fleets?

ChargePoint is the leader in EV charging solutions. We make it fast and easy to get EV charging, and our fleet management tools save you energy, time and money. When you choose ChargePoint, you get:

- + Smart, networked charging stations
- + Expert guidance to select the right charging stations and services for you
- + A single dashboard to manage your fleet vehicles and charging stations
- + In-depth data and analytics to help you make informed decisions
- + Energy management tools that lower your total cost of ownership by cutting capital and operating expenses
- + 24/7 phone support for your drivers
- + A dedicated, expert support team to assist your station managers and you
- + ChargePoint Assure protection to keep your charging stations operating at their best
- + A mobile app that offers drivers features like station availability, Notify Me, Waitlist and Valet as well as ability to track energy use.
